OUR ROOFING EXPERTISE

When building or renovating your dream home the selection process is an exciting and memorable experience.

One of the largest and most visible external features of your home is the roof. We know choosing the right roof tile for your dream home is important, that's why our Monier Collections Brochure is designed to help simplify your decision.

At Monier we continue to innovate because we know that design trends change, and technology continues to improve the performance of roofing materials. From the very first Australian Wunderlich Terracotta tile, we have always looked forward. In 2011, Monier installed the nation's very first integrated solar tile roof, setting in motion a new wave of roofing design across Australia.

For more than 100 years Monier roof tiles have not just made Australian homes more intrinsically beautiful, but also protected us from our harsh environment. Backed by CSR an ASX leader, our customers can be sure Monier roof tiles are Australian manufactured ensuring superior quality, performance, and service.

As for the next hundred years, Monier will still be thinking ahead, harnessing the sun, and sheltering us from the storm with attractively designed roofs. So, whether it is a look you want to achieve or a roof that fully embraces the sun, our roofing products are the perfect material to complete your home.

Expect more from your roof with Monier.

SELECTING A ROOF

🕒 **BETTER COLOUR PERFORMANCE***

🌊 **SALT SAFE**

💡 **THERMAL INSULATION**

🔊 **ACOUSTIC INSULATION**

Ensuring you pick the right roof can make or break the look of your home. With the roof making up to 30% of the façade of your home, it's no wonder making the right choice is important. First impressions definitely count in increasing the value of your home.

So whether it is a look you want to achieve, the best possible material or building within a budget, we have put together a simple guide to help pick the right roof for you.

SELECT BY TILE MATERIAL

TERRACOTTA

-  CERAMIC COLOUR THAT LASTS A LIFETIME
-  NOISE REDUCTION
-  SUPERIOR THERMAL PERFORMANCE

When it comes to performance and colour, nothing is longer lasting than Terracotta. Monier Terracotta roof tiles are made from natural Australian clay and fired at a temperature of over 1000°C, baking the colour right into the tile, enabling it to withstand Australia's harshest weather elements and the test of time. That's why we offer a 50-year guarantee on both colour and performance.

SEE PAGE 16

CONCRETE

-  BETTER COLOUR PERFORMANCE
-  STRENGTHENS WITH AGE
-  SUPERIOR THERMAL PERFORMANCE

Concrete tiles are the most economical roofing material on the market. Just like concrete bridges and structural elements of buildings, concrete tiles get stronger with age. Concrete tiles are tested to withstand the harsh Australian weather and comes in a wide selection of colours and profiles. Our C-LOC™ Colour Technology allows our tile to retain its gloss 8x better than COLORBOND® Steel*.

SEE PAGE 20

SOLAR ROOFING

-  INTEGRATED SOLAR SYSTEM
-  MODERN & INNOVATIVE DESIGN
-  ELECTRICITY SAVINGS

Monier Solar Roofing combines the power of 100-years' roofing experience with the high-tech solar expertise of Bradford Energy™. Monier has launched an Australian-first with InLineSOLAR™, innovations that strengthens its rich history and position as Australia's leading and innovative roofing company.

SELECT BY LOOK

Monier's versatile product range allows for many different architectural styles to be accommodated. From the classic Hamptons look on-trend now to a modern industrial style, there is a Monier material, profile and colour to suit your dream home. Speak to a roofing expert at Monier today to find out more about how to match your roof to your style.

HAMPTONS

There's a certain coastal feeling about the Hamptons, which is after all, a beachside holiday destination. Distressed white trims, understated grey tiles and sun bleached colours form the cornerstone of the style. Monier Cambridge or Madison tiles are an ideal match for the sophisticated look that is created by a Hampton-style home.

COASTAL

The architecture of a coastal home aims to capture this essence; made up of natural materials such as weathered timber & stone this style is perfectly suited to native surroundings. Colours blend into sand and sea - a mix of earthy and light natural colours capture the palette of the Australian coastline. Highlights of recycled or reclaimed materials promote sustainable practices. Coastal building materials must withstand the harsh elements and be durable in tough coastal conditions, making Monier roof tiles the perfect roofing solution.

DESIGNER HOME

The Designer style home is one of the most popular when it comes to a new build or an exterior renovation as it provides elements you can easily use to update the look of your home. A combination of mixed materials including stacked stone, render and modern brick come together to create a layered contemporary look.

ON LOOKS, DOWNLOAD
MONIER'S LOOK BOOK
MONIER.COM.AU

ULTRA CONTEMPORARY

Contemporary homes often get strong reactions, but whether you like the look or not, they make a statement. Contemporary homes feature composite facades with mixtures of brick, timber, render or composite materials. Monier flat profiled tiles such as Terracotta Urban Shingle or Concrete Horizon create a streamline flat look that works hand in hand with contemporary designs.

COLOUR PERFORMANCE BY RANGE

The benefits of Monier's roofing products are their longevity and flexibility. Here is an overview of our colour performance and technology by range.

TERRACOTTA

Terracotta has colour baked in for life. There's a richness and depth of colour with terracotta so it will never fade, ensuring the beauty, value and integrity of your home is preserved for decades to come.

Monier's Terracotta range is made in Australia from Australian clay and comes with a 50-year colour and performance guarantee. Terracotta tiles are the leader in colour retention to ensure a strong and beautiful roof for years to come.

CONCRETE

Monier concrete roof tiles come in the widest range of colours and profiles.

With Monier's continual commitment to innovation, we offer the latest technology in colour and coating, to ensure you have the best looking roof in the street!

COLOUR THROUGH TECHNOLOGY

Colour Through Technology is a technology mixed in with the concrete so a darker shade of concrete goes right through the body of the tile, which helps maintain the look of your roof over time. Our Colour-Through tiles are also coated with C-LOC™ for extra colour and gloss longevity. Colour-Through and C-LOC™ are available on our Madison & Cambridge tiles.

C-LOC™ Colour Lock Technology is our latest generation in coating. Exclusive to Monier, it retains gloss for even longer, so your roof is more resistant to fade. Monier C-LOC™ Technology has been independently tested to have 8x better gloss performance than standard COLORBOND® Steel. C-LOC™ is available on all of Monier's Concrete range.

PRODUCT TESTING

Independent testing has shown that after 2,000 hours of accelerated weathering,* standard COLORBOND® steel loses 98% of its gloss and shows a significant change in visual appearance, whereas C-LOC™ loses only 12% with no visible change in appearance. With 8 times more gloss retention, Monier's technology outperforms other concrete tile and metal roofing competitors.

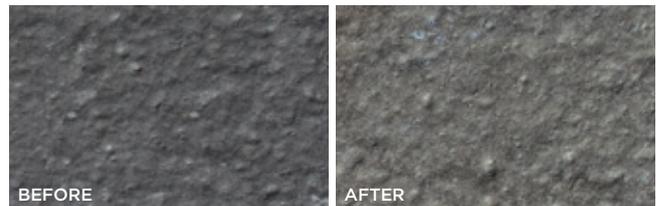

| PRODUCT | LOSS OF GLOSS |
|---|---|
| Monier terracotta tiles | 0% - loss |
| Monier concrete with C-LOC™ coating |  12% - loss |
| Competitor concrete tile with solvent-based coating |  83% - loss |
| COLORBOND® steel |  98% - loss |

*Product samples are independently tested in a NATA certified lab for 2,000 hours with cycles of UV exposure and condensation to simulate natural weather exposure. Testing has been performed on product samples of similar colour for fair comparison.

7 REASONS WHY YOU SHOULD CHOOSE TILES

The roof generally makes up 30% of the surface of your home. First impressions definitely count and can add significant value to your home.

1 TILES CAN CREATE THE RIGHT LOOK FOR YOUR HOME

Tiles come in a wide range of colours and profiles. So, whatever your style, whether it is the classic Hamptons, a more modern streamlined look, tiles can blend in seamlessly with the exterior design.

2 TILES ARE BEST SUITED FOR AUSTRALIAN CONDITIONS

Our harsh weather and extreme climate changes can be tough on roofing materials, particularly along Australia's coastline. Unlike metal, tiles don't rust or corrode and terracotta tiles won't fade over time. It's important to note that if you buy a standard COLORBOND® steel or ZINCALUME roof your warranty may be limited if you live within 5km of salt water.

3 COLOUR LASTS LONGER ON TILES

Unlike metal roofs, Terracotta colour is forever, thanks to its manufacturing process, in which the colour is baked in at extremely high heat so the colour never fades.

While concrete tiles can fade gradually over time, Monier concrete tiles tested in lab conditions simulating natural weather exposure shows better colour performance than standard COLORBOND® Steel.¹ Additionally, Monier concrete tiles offer C-LOC™ & Colour Through Technologies to retain the look, beauty and re-sale value of your home Review.

4 TILES ARE RESILIENT

Concrete tiles like other concrete products actually get stronger with age. Given their strength, tiles will not crack if you walk on them in the correct place. In the unlikely case of broken tiles, you only need to replace individual tiles versus a whole sheet of damaged metal.

5 TILES ARE RESISTANT TO HIGH WINDS

The nature of concrete & terracotta tiles means they may perform better than sheet metal in extreme wind conditions as wind uplift forces are significantly lower in tiled roofs.²

6 MONIER TILES COME WITH WARRANTIES THAT YOU CAN TRUST

Monier terracotta roof tiles come with a full 50-year performance and colour guarantee; while concrete roof tiles come with a full 50-year performance guarantee. COLORBOND® Steel offers up to 36-years warranty on standard steel, which may be affected if your roof:

- rusts where sheets overlap
- corrodes due to contact with sunscreen
- corrodes due to contact with soil
- lives within 5km of the ocean.

7 TILES CAN BE USED ON LOW-PITCHED ROOFS

Monier's roofing solutions are suitable for lower-pitched roofs. Concrete tiles can reach a pitch of 15 degrees with sarking, Terracotta Nouveau can reach 12 degrees with sarking and for a flat Terracotta profile, Urban Shingle can reach 18 degrees with sarking.

SELECTING THE FINISH OF YOUR ROOF

At Monier we know how important getting the right look for your home is, that's why we offer lapped and A-line ridge options available for both concrete and terracotta tiles.

A-LINE RIDGE - FOR THAT CONTEMPORARY LOOK

When completing a project, the finish of a product can make all the difference. It's the same for roofing. If it is a more contemporary, minimalist look you are trying to create, consider A-Line Ridge. For a more traditional look a lapped ridge works really well with our profiled tiles.

COLOUR RANGE

MONIER TILES DELIVER OUTSTANDING GLOSS RETENTION.

YOUR HOME WILL LOOK BETTER FOR LONGER WITH C-LOC™

Monier are committed to best in class product quality and testing. After 2,000 hours of independent testing to Australian weather conditions, results showed standard COLORBOND® steel loses 98% of its gloss - meaning your roof will look older sooner. This colour change results from gradual surface degradation caused by outdoor exposure.

*Product samples are independently tested in a NATA certified lab for 2,000 hours with cycles of UV exposure and condensation to simulate natural weather exposure. Testing has been performed on product samples of similar colour for fair comparison

TERRACOTTA TILE

CONCRETE TILES WITH C-LOC™ COATING

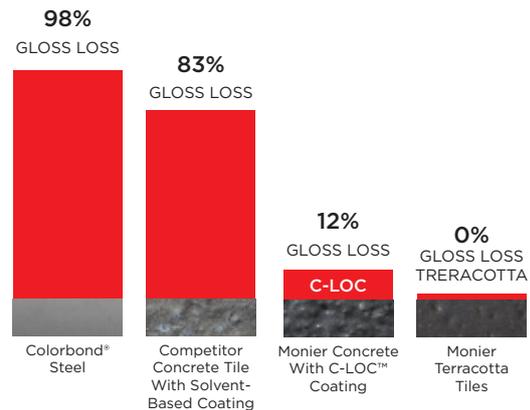

COLORBOND® STEEL COLOUR: MONUMENT

MONIER TILES DELIVER OUTSTANDING GLOSS RETENTION

Monier C-LOC™ technology outperforms metal roofing products in gloss retention. C-LOC™ technology loses only 12% of gloss in the same time metal roofing loses 98% of its gloss - which means minimal visible change in appearance for Monier tiles.

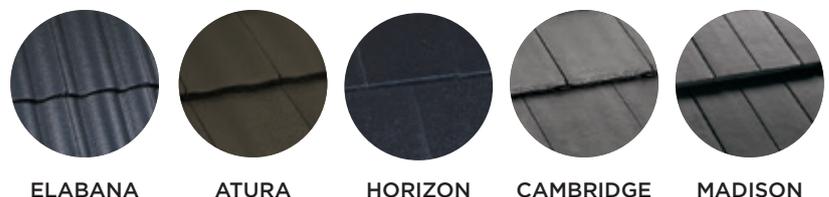

MAKING A PROVEN PRODUCT ALREADY BETTER

Monier has a very rich and proud history, protecting families from the harsh Australian conditions for over 100 years. All Monier concrete products outperform other concrete tile and metal roofing competitors. Monier concrete tiles have stood the test of time and are proven to protect the people you love from the harsh Australian elements.

C-LOC™ COATED CONCRETE TILES:

- 8x better gloss retention than COLORBOND® Steel
- Won't rust or corrode where metal will
- Concrete tiles get stronger with age
- Environmentally friendly low VOC coating
- Provides better thermal insulation than metal

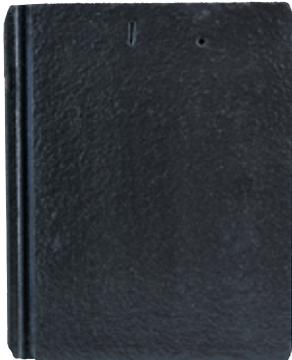

C-LOC™ COATINGS ARE APPLIED TO MONIER'S RANGE OF CONCRETE TILES:

ACCESSORIES & INSTALLATION

 MORE COMFORTABLE

 ENERGY EFFICIENT

 HEALTHIER

OPTIMISE YOUR ROOF TO CREATE A HIGH PERFORMING ENERGY EFFICIENT HOME

The right sarking and ventilation system can make your home more comfortable, improve energy efficiency and control condensation. To optimise the performance of your new Monier™ tiled roof, consider installing Bradford™ roof sarking and Bradford ventilation products.

The right roof sarking combined with a powered or wind-driven ventilation solution can help a tiled roof keep your home cooler throughout summer. Ventilation also helps reduce the risk of harmful condensation all year round by regularly replacing the air in your roof cavity.

MAKE YOUR HOME AS EFFICIENT AS POSSIBLE

Thermoseal™ also acts as a protective secondary barrier to minimise weather related damage such as wind driven rain from entering the roof cavity.

Thermoseal™ roof sarking keeps your home cooler in summer and warmer in winter and significantly increases the thermal efficiency of your home.

For cooler climates, we recommend Enviroseal roof sarking for effective condensation management and protection from weather related damage.

CONTINUOUS COMFORT IN A FRESHER, HEALTHIER HOME

Bradford ventilation encourages fresh air into your home and creates a more comfortable, healthier living environment for your family.

HEAT REDUCTION

In summer, your roof space can reach temperatures of up to 70°C. Put simply, a roof ventilator removes the heat and replaces it with cooler ambient air. This helps your insulation work more effectively and reduces the need to run your air conditioner to keep your home comfortable.

MOISTURE MANAGEMENT

The buildup of humidity in the home and roof space can lead to harmful condensation, which can pose risks for the health of your home and your family. Moisture leads to mould and mildew that can trigger asthma and allergies. The right ventilation solution will reduce the risk of condensation-related damage to your home and avoid the health risks caused by mould formation.

AIR QUALITY

There's nothing like a breath of fresh air, but many homes aren't designed to encourage air circulation. Bradford roof and sub floor vents, ceiling grilles, and air transfer systems help to encourage fresh air into areas of your home where it's most beneficial.

HOW TO CHOOSE THE RIGHT SYSTEM FOR HOMES WITH TILED ROOFS

To select the right ventilator for your home, simply select the Bradford product that corresponds to your needs.

BRADFORD POWERED VENTILATION

AiroMatic®

Equivalent to 6 wind driven vents

Allows natural light into the roof space

Maestro BAL™

Clear acrylic head lets in natural light

Deters pests from entering roof space

SupaVent™

UV stable polymer

Suitable for coastal areas

Low profile design

ROOF RESTORATION & MAINTENANCE RANGE

Monier's Roof Restoration and maintenance range has been designed by the roofing experts to perform in Australian conditions.

The range is designed for use on all types of concrete and terracotta roofs.* Importantly, the entire product range meets all relevant Australian standards so you're assured of product quality and durability.

Working at heights has risks and Monier recommends all work should be carried out by a qualified roofing specialist.

For more information on the Monier roof restoration and maintenance range please refer to our website at: www.monier.com.au

*Monier does not recommend the use of Roofcoat™ on Terracotta roof tile.
